PATENT-BACKED · MADE IN INDIA

HORIZON

Sovereign Autonomous Enterprise Infrastructure Recovery Platform

PagerDuty plus an autopilot — built in India, with cryptographic proof of every action.

Sarvam AI · MST Blockchain

DAG-ordered recovery

Kahn topological sort

Human-signed approvals

EIP-712 wallet gates

Chain-anchored audit

SHA-256 Merkle proofs

DISTRIBUTED SYSTEMS FAIL IN CHAINS

Problem

Failures cascade. Manual, out-of-order restarts stretch costly downtime.

Idea

Detect, map dependencies and restore services in the mathematically correct order.

USP

Graph-based recovery, human approval for risky actions, blockchain proof of every step.

Innovation

Deterministic algorithms, multilingual AI and tamper-evident audit trails in one platform.

BUILT FOR MISSION-CRITICAL TEAMS

Cloud-native startups

Lean teams, complex microservice graphs

SRE & DevOps teams

Prolonged outages, thin on-call rotations

BFSI & FinTech

Regulatory accountability, CERT-In ready

HealthTech & GovTech

Secure, locally adaptable operations

E-commerce enterprises

Downtime that costs revenue per minute

Managed service providers

Many clients, one governed recovery layer

Multilingual teams

Local-language operations

Regulated environments

FROM FAILURE TO PROOF, AUTOMATICALLY

1

Detect

Health probes flag failures

2

Map

Dependencies as a live DAG

3

Assess

Blast radius and cascade impact

4

Recover

Dependency-ordered playbooks

5

Prove

Hashes anchored on-chain

Autonomous

AUTO

Low-risk recovery actions execute on their own, instantly.

Human-authorized

SIGNED

DB failovers and stateful changes require an EIP-712 wallet signature.

ONE RECOVERY PIPELINE, SEVEN STAGES

1. **Telemetry**
2. **Anomaly detection**
3. **Dependency analysis**
4. **AI SRE reasoning**
5. **Governance gate**
6. **Playbook execution**
7. **On-chain anchor**

1 Live DAG
3-miss probes confirm outages, no flapping

2 Blast radius
O(V+E) isolation of the downstream cascade

3 Topological order
Databases → Caches → APIs, no crash loops

4 Governed execution
Low-risk heals auto; risky ones await a signature

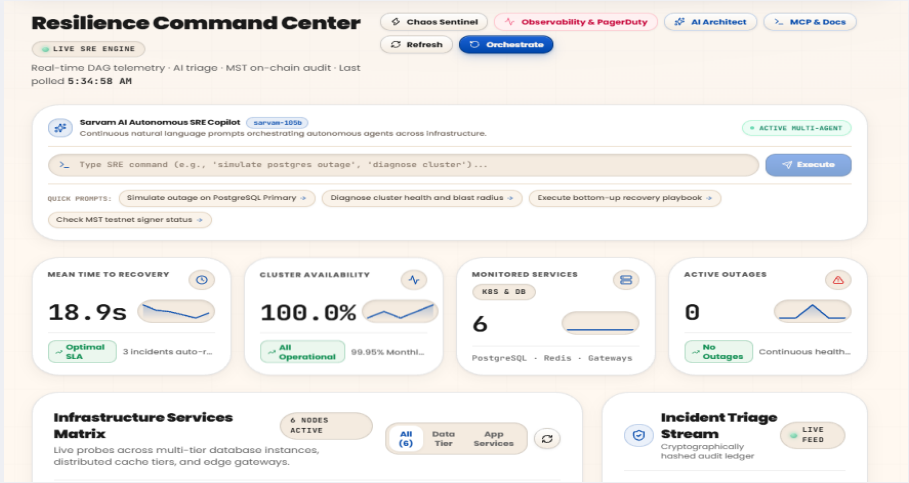

5 Verify & anchor
Health-gated unlock, Merkle proofs on-chain

LLM proposes · Deterministic guardrails dispose

Design · 05

UI AND WIREFRAMES

INTERACTIVE PROTOTYPE · 5-DAY BUILD SPRINT

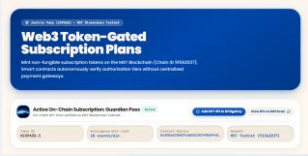

Resilience Command Center

Cryptographic Audit Vault

Tamper-evident logs

Token-gated

Web3 plans on MST

MCP server reference

Tools for AI agents

FEASIBLE, FAST AND FUNDABLE

< 3 ms	< 2 min	100%	< ₹0.10
1,000+ node recovery plan	MTTR, down from 45 min	Indian data residency	Gas per on-chain anchor

TECHNICAL STRENGTHS

Deterministic core

Pure TypeScript, isolated from LLM hallucination

Native connectors

Docker, Kubernetes and MCP IDE tools

Cycle & flap resilient

DFS cycle detection, sliding-window probes

GO-TO-MARKET ADVANTAGES

Regulatory driver

Automates CERT-In 6-hour reporting on-chain

PLG flywheel

@horizon/mcp-server inside Cursor and Claude

Sovereign pricing

INR plans remove USD forex volatility

OTHERS ALERT. HORIZON RECOVERS.

ALTERNATIVE	WHAT IT DOES		HORIZON
Datadog / Dynatrace	Alerts on issues	vs	**Actuates automated recovery**
PagerDuty / Rootly	Pages on-call humans	vs	**Resolves incidents autonomously**
StackStorm / Rundeck	Runs static scripts	vs	**Derives dynamic DAG plans**
Generic LLM agents	Hallucinate commands	vs	**Enforces deterministic math**
Prior art · US12556441B1	Static mapping	vs	**Re-plans dynamically on probe failures**

BUSINESS MODEL

95%	82%	<₹12
MTTR reduction	Gross margin	Marginal cost per recovery

PRIMARY REVENUE

Tiered subscriptions
INR plans, ₹0 to ₹24,999/mo

Enterprise licensing
Annual, dedicated and on-prem

API & MCP access
Usage-based for developers

NEXT-STAGE & FUTURE

AI & platform add-ons
Usage-based Sarvam AI

Web3 subscriptions
Token-gated plans

Playbook marketplace
Community playbooks

VISION AND ROADMAP

India's sovereign resilience platform

Indian AI.

India-built blockchain.

Enterprise-grade engineering.

Faster, safer, more transparent recovery for every industry.

PATENT REGISTERED · MADE IN INDIA
INDIA

NOW

- UI and wireframes
- Recovery-engine architecture
- EIP-712 governance design
- Patent registered

NEXT

- Working prototype
- Industry partners for early and mid-stage startups
- Agentic-era product refinement

LATER

- Dedicated and on-prem deployments
- Recovery playbook marketplace
- Global resilience footprint

FULL RECOVERY PIPELINE

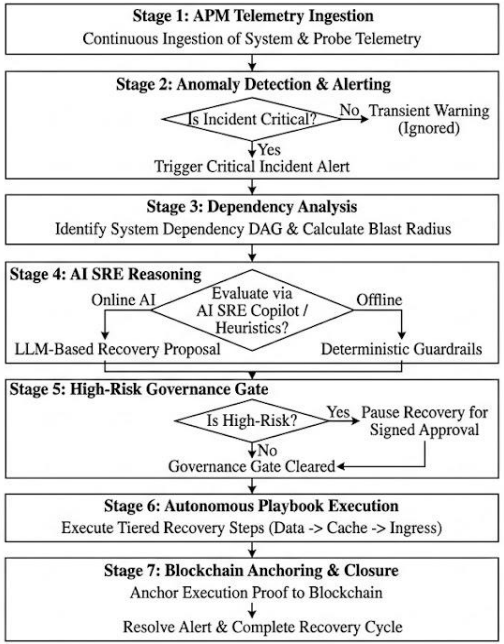

Figure 1: Generalized Autonomous SRE Recovery Pipeline with Governance Gateways.
